• IMPORTANT INFORMATION! •

**The information in this presentation may change over time, based on unforeseen situations, and by the will of the Community!
By the will of community and solely in his interests changes may be made!**

• GENERAL INFORMATION •

Token Symbol: \$PHMN

Format: CW20 (token on Juno Network)

Max Supply: 131,072

Decimals: 6

Capitalization: 20% of POSTHUMAN profit from all networks, which will be converted into \$JUNO

Purpose: Investment Tool + Governance

Utility: Hold, Invest, Transfer, Exchange, Govern DAS, Earn Privilege

• TOKENOMICS •

1

Within 8 years (from 2022 to 2030), the POSTHUMAN validator will issue 131,072 \$PHMN tokens in CW20 format on the Juno Network blockchain, the value of which will be equal to 20% of the total profit from all networks that POSTHUMAN validates both in the present and in future.

At the moment, these are 21 Main Networks, both in the Cosmos Ecosystem and beyond.

2

To give the value to \$PHMN token, we will create PHMN/JUNO Liquidity Pool on the junoswap.com platform.

3

Initially, 50,000 \$PHMN will be created, which will be directed to the Liquidity Pool on one side once, while the second side of the Liquidity Pool will be constantly replenished with \$JUNO.

4

Approximately once every 72 hours, 20% of all profits from all networks validated by POSTHUMAN will be converted into \$JUNO

5

Half of the received \$JUNO will be used to purchase \$PHMN, after which the PHMN/JUNO Liquidity Pool will be replenished with \$JUNO and \$PHMN in equal proportions

6

As a result, one side of the PHMN/JUNO Pool will remain almost unchanged, while the other side will constantly increase, which will lead to a constant increase in the price of the \$PHMN token.

• EXAMPLE FOR BETTER UNDERSTANDING •

***The data in the "Example for better understanding" is not real data!
It doesn't count real changes in the ratio of the amount of \$PHMN and \$JUNO in the Liquidity Pool, and it's provided solely to explain the mechanics of replenishing the PHMN/JUNO Liquidity Pool.
This data should not be the basis for investment!***

For example, we have PHMN/JUNO Liquidity Pool.

On one side of the Pool 50,000 \$PHMN,
on the other side
1,000 \$JUNO.

Ratio in LP:
 $1 \text{ \$PHNM} = 0.02 \text{ \$JUNO}$

The POSTHUMAN validator receives 20%
of the profits (as an example: the
equivalent of 200 \$JUNO)

100 \$JUNO is spent to buy 5,000
\$PHMN, after which the ratio in the
Liquidity Pool becomes
45,000 \$PHMN - 1,100 \$JUNO.

Thereafter, 5,000 \$PHMN and 100
\$JUNO are added to the Liquidity Pool,
after which the ratio in LP becomes
50,000 \$PHMN - 1,200 \$JUNO.

Ratio in LP:
 $1 \text{ \$PHNM} = 0.024 \text{ \$JUNO}$

This example doesn't reflect the real change in the ratios of \$PHMN and \$JUNO in LP, and it's a simplification for a better understanding of the process of replenishing the PHMN/JUNO Liquidity Pool.

• CREATION AND DISTRIBUTION OF \$PHMN •

The creation and distribution of \$PHMN tokens will take place over 8 years: from 2022 to 2030.

The creation and distribution of \$PHMN tokens will take place in 60 stages:

- 61,072 \$PHMN (~ 46.6% of Max Supply) will be created and distributed during 2022 in 4 stages
- 70,000 \$PHMN (~ 53.4% of Max Supply) will be created and distributed over the next 7 years (from 2023 to 2030) in 56 stages (8 stages per year)

\$PHMN tokens will be distributed among 4 categories:

- PHMN/JUNO Liquidity Pool
- Individual Delegators in all networks POSTHUMAN validates
- \$PHMN token holders
- POSTHUMAN validator core-Team

The allocation to the Delegators and Holders categories will be based on surprise network snapshots that will take place every quarter from Q2-2022 to Q4-2029.

• DISTRIBUTION OF \$PHMN BY 4 CATEGORIES
FOR THE PERIOD FROM 2022 TO 2030 •

Liquidity Pool PHMN/JUNO

50,000 \$PHMN (~ 38.1%)

Distribution for 1 stage in
period Q1-2022.

Individual Delegators

49,000 \$PHMN (~ 37.4%)

Distribution over 59 stages:
- 3 stages (1 time per quarter) in
the period Q2-Q3-Q4-2022;
- 56 stages (2 times per quarter)
from Q1-2023 to Q4-2029.

POSTHUMAN core-team

1,072 \$PHMN (~ 0.8%)

Distribution over 8 stages:
- 1 time every Q4 from 2022 to
2029.

\$PHMN-holders

31,000 \$PHMN (~ 23.7%)

Distribution over 58 stages:
- 2 stages (1 quarterly) during
Q3-Q4-2022;
- 56 stages (2 times per quarter)
from Q1-2023 to Q4-2029.

• DIAGRAM OF THE CREATION AND DISTRIBUTION OF \$PHMN DURING 2022 AND OVER THE NEXT 7 YEARS (FROM 2023 TO 2030) •

• \$PHMN UTILITY •

🟡 **Hold:**

Between Q3-2022 and Q4-2029 (inclusive), the \$PHMN token can be held for the purpose of receiving future StakeDrops (\$PHMN-holders will in general be allocated ~23.7% of the Max Supply)

🟡 **Investing:**

The \$PHMN token can be used as an investment instrument, as under the Expected Development Scenario and thanks to tokenomics, the price of \$PHMN in \$JUNO will constantly increase

🟡 **Cross-chain Transfer:**

The \$PHMN token can be transferred both within the Juno Network and between any blockchains with an implemented IBC-Protocol

🟢 **Decentralized Exchange:**

\$PHMN token can be exchanged for \$JUNO in the PHMN/JUNO Liquidity Pool on the decentralized platform junoswap.com

🟢 **DAS Governance:**

The \$PHMN Token will enable the creation of proposals and voting on proposals within the Decentralized Autonomous Synchronization that drives the economic development of the POSTHUMAN validator

🟢 **Getting Privileges:**

The \$PHMN token will give a number of privileges for receiving merch and NFT from the POSTHUMAN validator, as well as bonuses for the initial distribution of tokens from the Sputnik Network

• POSTHUMAN VALIDATOR DEVELOPMENT DATA •

- Between the end of 2019 and the beginning of 2022, the number of networks that POSTHUMAN validates has grown from one Testnet to 21 Mainnets and 2 Testnets
 - In the period from the end of 2019 to the beginning of 2022, the core-Team of the POSTHUMAN validator has grown from 1 person to 4 people
- The total capitalization of funds delegated to the POSTHUMAN validator exceeded \$26,000,000 (*as of March 24, 2022)
 - 20% of daily profit from all networks validated by POSTHUMAN exceeded \$200 (*as of March 24, 2022)
- POSTHUMAN is one of the most active validators, contributing to the development of Networks and Communities, which helps to attract new delegations from both community members and project funds

• WHAT ELSE TO EXPECT? •

Issuance of useful NFTs for long-term POSTHUMAN delegators:

“1 month staker”,
“3 months staker”,
“6 months staker”,
“1 year staker”.

The owners of these NFTs will receive more \$PHMN with each round of distribution.

Details will be published later.

Merchandise (bags, t-shirts, hoodies) **with POSTHUMAN branding**, available exclusively for \$PHMN

StakeDrop of \$NETR tokens for \$PHMN holders at the launch of the Sputnik Network blockchain

• ROAD MAP •

Q1-2022

Establishment of PHMN/JUNO Liquidity Pool

One side of the Pool:
50,000 \$PHMN (~ 38.1% of
the Max Supply)

This side of the Pool will
be replenished once. 10%
of profits will be
converted to \$JUNO to
buy \$PHMN

On the second side of the
Pool: 10% of the total
profit of the POSTHUMAN
validator from all
validated networks will be
converted into \$JUNO to
replenish LP in pair with
\$PHMN

The second side of the
Pool will be constantly
replenished with \$JUNO

Q2-2022

3,000 \$PHMN StakeDrop (~2.3% of Max Supply) on all POSTHUMAN Individual Delegators on all networks POSTHUMAN validates

Even if all delegates
decide to sell \$PHMN, this
will change the ratio in
the Liquidity Pool very
little.

20% of profits will be
converted into \$JUNO,
half will be spent to buy
\$PHMN to replenish the
PHMN/JUNO pool in equal
proportions.

• ROAD MAP •

Q3-2022

Launch of Decentralized Autonomous Synchronization (analogous to DAO with adapted name) to manage the economic development of the POSTHUMAN validator

+

4,000 StakeDrop \$PHMN (~3.1% of Max Supply) for Individual Delegators and \$PHMN Holders

- 1,600 \$PHMN distributed to \$PHMN-holders

- 2,400 \$PHMN distributed among Individual Delegators

20% of profits will be converted into \$JUNO, half will be spent to buy \$PHMN to replenish the PHMN/JUNO pool in equal proportions.

Q4-2022

4,072 \$PHMN StakeDrop (~3.1% of Max Supply) for Individual POSTHUMAN Delegators, \$PHMN holders and POSTHUMAN validator core-Team.

- 1,600 \$PHT distributed to \$PHMN-holders

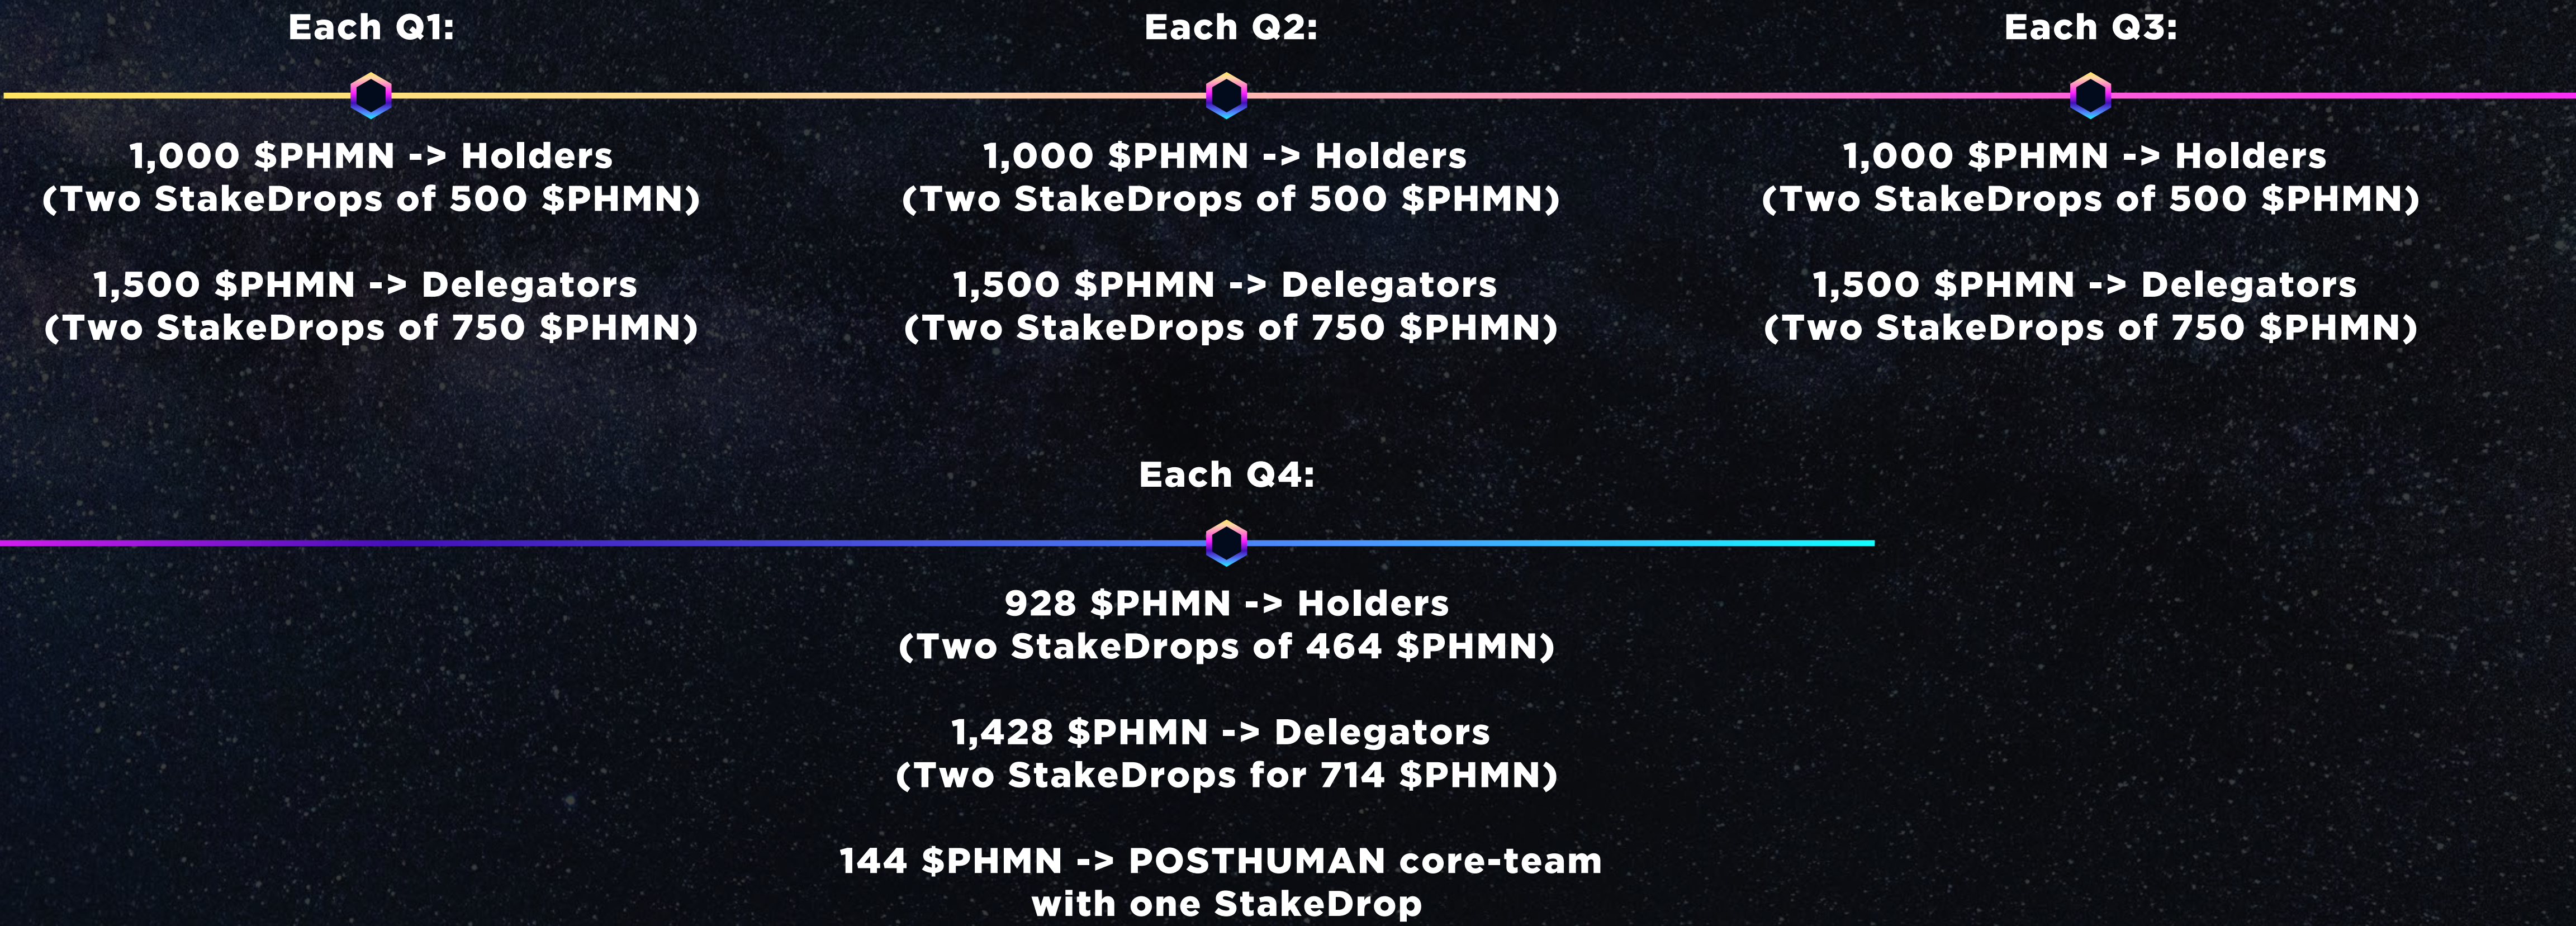

- 2,400 \$PHMN distributed among Individual Delegators

- 72 \$PHMN will be distributed among the POSTHUMAN core-team

20% of profits will be converted into \$JUNO, half will be spent to buy \$PHMN to replenish the PHMN/JUNO pool in equal proportions.

• ROAD MAP •

Every year, from 2023 to 2028 inclusive, StakeDrops for Delegators and Holders will be made twice a quarter. And every Q4, a small amount of \$PHMN will be distributed among the core-Team:

• ROAD MAP •

In 2029, StakeDrops for Delegators and Holders will be made twice a quarter. And in Q4-2029, a small amount of \$PHMN will be distributed among the core-Team:

Q1-2029:

**1,000 \$PHMN -> Holders
(Two StakeDrops of 500 \$PHMN)**

**1,500 \$PHMN -> Delegators
(Two StakeDrops of 750 \$PHMN)**

Q2-2029:

**1,000 \$PHMN -> Holders
(Two StakeDrops of 500 \$PHMN)**

**1,500 \$PHMN -> Delegators
(Two StakeDrops of 750 \$PHMN)**

Q3-2029:

**1,000 \$PHMN -> Holders
(Two StakeDrops of 500 \$PHMN)**

**1,500 \$PHMN -> Delegators
(Two StakeDrops of 750 \$PHMN)**

Q4-2029:

**932 \$PHMN -> Holders
(Two StakeDrops of 466 \$PHMN)**

**1,432 \$PHMN -> Delegators
(Two StakeDrops of 716 \$PHMN)**

**136 \$PHMN -> POSTHUMAN core-team
with one StakeDrop**

• ROAD MAP •

Starting in 2030, the Max Supply will be reached and the \$PHMN StakeDrops will end.

At the same time, 20% of the profits will continue to be converted into \$JUNO, half of which will be used to purchase the \$PHMN token in order to replenish the PHMN/JUNO Liquidity Pool in equal proportions, until New (yet not appearing) Technologies change our world.

But since the unlock of \$JUNO tokens for Juno Network developers will not happen until 2033, you can be sure that until 2033 everything will go according to plan!

• THANKS FOR ATTENTION! •
